PROFESSIONAL SUMMARY

Aspiring Java Full-Stack Developer with hands-on training in scalable backend architecture using Spring Boot, Hibernate, and RESTful APIs, paired with modern responsive frontends built on React.js. Demonstrated background in relational database optimization (MySQL, Oracle DB), data structures, and object-oriented programming. Proven capacity to take web applications from design through production deployment.

TECHNICAL SKILLS

Programming & Core:	Java (Core & Advanced), OOPs, Data Structures & Algorithms (DSA), Problem Solving
Backend Frameworks:	Spring Framework, Spring Boot, Hibernate ORM, JDBC, RESTful Web Services
Frontend Technologies:	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design
Databases & ORM:	MySQL, Oracle Database, SQL Query Optimization, CRUD Operations
Developer Tools:	Git, GitHub, GitHub Pages, Maven, Postman, Eclipse / IntelliJ IDEA

WORK EXPERIENCE

TAP Academy Bengaluru, India | 6 Months

Java Full-Stack Intern

- Architected and developed modular enterprise Java applications adhering to OOP design patterns, clean code standards, and MVC architecture.
- Engineered resilient RESTful endpoints and service layers utilizing **Spring Boot** and **Hibernate** to streamline server-side business logic and data persistence.
- Designed and executed high-performance SQL schemas, joins, and indexing structures across **MySQL** and **Oracle DB** to support ACID-compliant transactions.
- Built dynamic, reusable user interface components using **React.js** and integrated client-side views with backend REST endpoints via asynchronous HTTP requests.
- Employed **Git** for collaborative version management, code reviews, and resolving branch merge conflicts throughout sprint cycles.

KEY PROJECTS

Full-Stack E-Commerce & Inventory Management Portal Spring Boot, React.js, MySQL

- Developed an end-to-end web system delivering catalog browsing, cart operations, and order placement workflows.
- Constructed secured RESTful APIs with Spring Boot and Hibernate ORM for relational mapping and transactional data safety.
- Designed normalized MySQL database tables and executed queries through JDBC/JPA, reducing redundant reads.
- Created an interactive dashboard using React.js and CSS modules to provide real-time product updates and inventory tracking.

Interactive Game Application (Tic-Tac-Toe) JavaScript, HTML5, CSS3, GitHub Pages

- Engineered an asynchronous, browser-based two-player game featuring state management, dynamic DOM manipulation, and turn tracking.
- Implemented optimal matrix-checking algorithms to evaluate victory and stalemate conditions in under 2ms.
- Configured automated deployment workflows utilizing GitHub Pages for production accessibility and 100% uptime.

EDUCATION

Master of Computer Applications (MCA) – Computer Science 2023 – 2025

School of Management Sciences, Varanasi, India **CGPA: 7.3 / 10.0**
